

WARNING, do not expose UV light directly toward or in the eye.

Using Your Slime Kit Safely ×

Full safety information is at the back of this book. Please make sure an adult reads these instructions before using the kit.

Children should use this kit under the supervision of adults. The kit is not suitable for children under 3 years old.

Keep contents of kit away from eyes and mouth. In case of contact, wash with plenty of water.

Uh oh! My slime isn't looking quite right. What can I do?!

We have loads of simple solutions to help you get back on track with your slime.

The color isn't bright enough.

Make sure to add the glow in the dark color powder to the glue and mix well BEFORE you add the activator water. This will help to make sure the powder gets mixed in evenly and will ensure the entire slime is bright and glowing!

My slime doesn't glow in the dark.

Ensure you follow the exact measurements given in the instruction manual and mix the glow in the dark powder with the glue before adding the activator water. The slime need to be charged with light in order for it to glow as bright as possible - this is why we have given you a super handy mini UV torch. The most important thing is to make sure you are in a dark room so you can see amazing results!

My slime is not stretchy.

Slime can get too hard and rubbery and lose it's stretch if too much activator water is added. Ensure you follow the instructions accurately for the stretchiest slime! When making slime, you need to give it some time for all the ingredients to mix properly. It helps to play with the slime for at least a few minutes so the warmth from your hands softens it and gives a great stretch.

My slime is all wet and nasty. What's wrong?

Sometimes if you get the ratio of glue and activator water a little bit wrong then your slime can be a little bit wet and sticky. There are a couple of simple things you can do to fix this:

- 1. The slime must be kneaded really well for at least 5 minutes. A good method for kneading is to squash, stretch and fold the slime and knead it between your thumb and fingers. As long as you have used the correct amounts of glue and activator as directed, you will notice that after 5 minutes of this kneading method, that the slime will begin to form and lose its stickiness.
- 2. If after kneading your slime really well, it is still wet and sticky, try adding 2 or 3 small drops (not squirts) of activator and repeat the kneading process. Repeat this process of adding 2 small drops of activator water until the slime has lost all stickiness but it is still soft and stretchy. If you add too much activator, then your slime can turn too hard, so be careful not to add too much.
- 3. If after adding some of the clay to your slime, to make a butter slime, it becomes sticky again, try adding another 1 or 2 drops of activator water to fix the sticky feeling.

I left my slime for a day and now it's dried up. Can I fix it?

It's difficult to revive a dead slime. The best thing to do is start again and have loads more fun making new slime. Remember to keep your slime in the containers provided to make sure it lasts a long time.

Some important rules to remember when you are learning to make slime.

- 1. Always add colors and scents with the glue and stir before you add the activator to the mixture to ensure everything is distributed equally.
- 2. NEVER use too much activator at once. Only use very small quantities at a time and then stir for 30 seconds each time to ensure you don't make your slime too hard. Slime making requires patience and determination!
- 3. Have fun and experiment with your slime recipes! Bring out your inner scientist and enjoy the process!

IMPORTANT! PLEASE READ BEFORE YOU BEGIN!

Firstly, prepare your activator water. Follow the instructions on the bottle - you will need to add water to the borax powder, up to the shoulder height of the bottle, and shake well for a few seconds.

Before you start: the inks could stain and slime is messy. Use a plastic sheet or nonporous tablecloth to protect your surface. Wear old clothes. If you get slime on your clothes, hand wash immediately in very warm water. This will help the glue to break down!

Basic Glow in the Bark Slime

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowl - alternatively you can use the measuring cup to mix your slime but be sure to wash it between uses.
- Choose the glow in the dark powder color that you want to use and using the measuring spoon, carefully measure out 1 level spoonful of powder and add it to the glue. Mix well until combined evenly.
- Ensure you have prepared the activator water correctly by reading the
 instructions on the activator bottle. Place the nozzle lid onto the activator bottle
 for more accurate measurements. Measure out 1 level spoonful of the activator
 water using the measuring spoon and sprinkle it into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly
 formed as it will come away from the sides of the mixing bowl and stick together.
 If you feel like the slime isn't forming and it is still too sticky, add another 1 or 2
 small drops of activator water not spoonfuls, just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy.
- Check out your slime in a dark room how bright does it glow? Give it a boost by shining the mini UV torch on it for a few seconds!

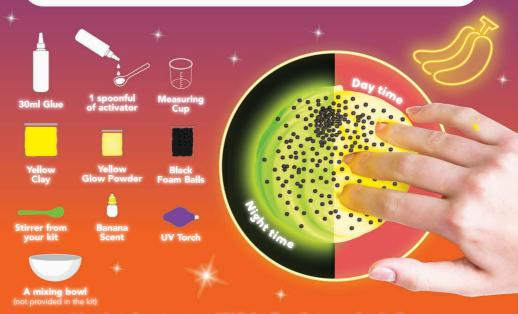

Warning, do not expose UV light directly toward or in the eye.
All contents in this kit are Non-Edible! Do not eat or put
any of the contents of this kit near or in your mouth!

Banana Butter Fluff

Mmmm, a soft, stretchy, buttery banana slime that smells delicious, feels amazing and comes alive in the dark!

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowlalternatively you can use the measuring cup to mix your slime but be sure to wash it between uses.
- Carefully measure out 1 level spoonful of the yellow glow powder and add it to the glue.
 Mix well until combined evenly.
- Add 3 short squirts of the banana scent and mix well.
- Ensure you have prepared the activator water correctly by reading the instructions on the
 activator bottle. (Place the nozzle lid onto the activator bottle for more accurate
 measurements.) Measure out 1 level spoonful of the activator water using the measuring
 spoon and sprinkle it into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly formed
 as it will come away from the sides of the mixing bowl and stick together. If you feel like
 the slime isn't forming and it is still too sticky, add another 1 or 2 small drops of activator
 water not spoonfuls, just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy.
- Next take a small amount of the yellow clay Just a very small handful is plenty. Mix the slime and the clay together well until you have a buttery banana slime.
- Add a small sprinkle of the black foam balls and any other add-ins that you want to add.
- So much fun to play with in a light or a dark room! Don't forget to charge your slime with the UV torch for an extra special glow effect! Can you draw a banana onto your slime?
- Stretch it, swirl it, poke it but don't eat it!!

Warning, do not expose UV light directly toward or in the eye.
All contents in this kit are Non-Edible! Do not eat or put
any of the contents of this kit near or in your mouth!

Orange Crispy Crunch Slime

This extra special Orange glowing crunchy slime includes a crispy treat - a great sensory slime!

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowl alternatively you can use the measuring cup to mix your slime but be sure to wash it between uses.
- Carefully measure out 1 level spoonful of the orange glow powder and add it to the glue. Mix well until combined evenly.
- Add a good sprinkle of orange glitter and mix well.
- Ensure you have prepared the activator water correctly by reading the instructions on the activator bottle. (Place the nozzle lid onto the activator bottle for more accurate measurements.) Measure out 1 level spoonful of the activator water using the measuring spoon and sprinkle it into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly formed as it will come away from the sides of the mixing bowl and stick together. If you feel like the slime isn't forming and it is still too sticky, add another 1 or 2 small drops of activator water not spoonfuls, just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy. Lay it down on the lid of the box.
- Very carefully take one of the purple metallic foil sheets from its wrapper and place it on the slime - it doesn't matter if it tears or breaks but try to retain the sheet whole on top of the slime if you can.
- Now using your fingertips listen out for the crispy sound - poke your fingers through the metallic foil into the slime until it is combined. Now stretch and pull the slime and watch the foil sheet come apart in the slime!
- Add a small handful of orange foam balls for extra crunch.
- As always the best bit is seeing what color your slime glows in the dark! Can you write your name in your slime with the UV light? The plastic carry case is glow in the dark to! Don't forget to scribble on that to!

Warning, do not expose UV light directly toward or in the eye.
All contents in this kit are Non-Edible! Do not eat or put
any of the contents of this kit near or in your mouth!

Banana Crunch Floam Slime

A crunchy, floamy, stretchy fun slime to poke and play with.

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowl

 alternatively you can use the measuring cup to mix your slime but be sure to wash it
 between uses.
- Carefully measure out 1 level spoonful of the yellow glow powder and add it to the glue.
 Mix well until combined evenly.
- Add 3 short squirts of the banana scent and mix well.
- Add yellow and pink glitter and mix well.
- Ensure you have prepared the activator water correctly by reading the instructions on the activator bottle. (Place the nozzle lid onto the activator bottle for more accurate measurements.) Measure out 1 level spoonful of the activator water using the measuring spoon and sprinkle it into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly formed
 as it will come away from the sides of the mixing bowl and stick together. If you feel like
 the slime isn't forming and it is still too sticky, add another 1 or 2 small drops of activator
 water not spoonfuls, just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy.
- Add a good handful of the yellow foam balls and a sprinkle of the pink glitter flakes and fold it all in to the slime.
- Charge up your slime with the UV torch and play in a dark room smells and looks delicious!!

Warning, do not expose UV light directly toward or in the eye.
All contents in this kit are Non-Edible! Do not eat or put
any of the contents of this kit near or in your mouth!

Pineapple Crunchy Punch Slime

A crunchy, fruity tropical pineapple party in your hand! Light up your slime in the dark for added magic!

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowl alternatively you can use the measuring cup to mix your slime but be sure to wash it between uses.
- Carefully measure out 1 level spoonful of the yellow glow powder and add it to the glue. Mix well until combined evenly.
- Add 3 short squirts of the pineapple scent and mix well.
- Ensure you have prepared the activator water correctly by reading the instructions on the
 activator bottle. (Place the nozzle lid onto the activator bottle for more accurate
 measurements.) Measure out 1 level spoonful of the activator water using the measuring
 spoon and sprinkle it into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly formed as it will
 come away from the sides of the mixing bowl and stick together. If you feel like the slime isn't
 forming and it is still too sticky, add another 1 or 2 small drops of activator water not
 spoonfuls, just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy.
- Scatter a few of the green foam balls and a sprinkle of the green glitter into the slime and fold
 in.
- Finally fold 3 to 4 of the foam cubes into the slime.
- So much fun to play with in a light or a dark room! Don't forget to charge your slime with the UV torch to really light things up! What can you scribble on your slime?
- Stretch it, swirl it, crunch it, pop it, poke it but don't eat it!!

Warning, do not expose UV light directly toward or in the eye.

All contents in this kit are Non-Edible! Do not eat or put
any of the contents of this kit near or in your mouth!

Jiggly Watermelon Jello Slime

This jiggly, water slime resembles a chopped up watermelon - ready for playing with in the light or dark!

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowl.
- Next measure out 20 ml of water and add this to the glue. Mix well.
- Carefully measure out 1 level spoonful of the pink glow powder and add it to the glue mixture.
 Mix well until combined evenly.
- Add a good sprinkle of pink glitter and this stage also.
- Ensure you have prepared the activator water correctly by reading the instructions on the
 activator bottle. (Place the nozzle lid onto the activator bottle for more accurate measurements.)
 Measure out 1 level spoonful of the activator water using the measuring spoon and sprinkle it
 into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly formed as it will
 come away from the sides of the mixing bowl and stick together. If you feel like the slime isn't
 forming and it is still too sticky, add another 1 or 2 small drops of activator water not spoonfuls,
 just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy. This jiggly
 slime is not quite as stretchy as the standard slime it should have more of a wobble, like jello.
 It's super fun to play with!
- Add a sprinkle of the black foam balls
- Finally fold 3 to 4 of the foam cubes into the slime.
- Try to shape your slime into a slice of watermelon and line the edge of the slime with a thin layer of the green clay. Can you make it look like a watermelon? Add a sprinkle of green glitter for extra sparkle!
- The most fun part is mixing it all up together to create a soft stretchy, jiggly butter slime in the dark! Watch the colors mix together as you shine the UV torch onto the slime - wow!

Warning, do not expose UV light directly toward or in the eye.
All contents in this kit are Non-Edible! Do not eat or put
any of the contents of this kit near or in your mouth!

Totally Tropical Rainbow Slime

This super special slime combines everything all at once to form a mega, sensory overload ultimate slime!

- Using the measuring cup, measure out 30ml clear glue. Pour this into your mixing bowl alternatively
 you can use the measuring cup to mix your slime but be sure to wash it between uses.
- Carefully measure out 1 level spoonful of the pink glow powder and add it to the glue. Add a sprinkle
 of glitter also. Mix well until combined evenly.
- Add some of the banana or pineapple scent if desired mix well to combine.
- Ensure you have prepared the activator water correctly by reading the instructions on the activator bottle. (Place the nozzle lid onto the activator bottle for more accurate measurements.) Measure out 1 level spoonful of the activator water using the measuring spoon and sprinkle it into the glue mixture.
- Stir well until the slime starts to form. You will know when your slime is properly formed as it will come
 away from the sides of the mixing bowl and stick together. If you feel like the slime isn't forming and it
 is still too sticky, add another 1 or 2 small drops of activator water not spoonfuls, just small drops at
 this stade.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy.
- Next prepare another 3 slimes following the same method as above but using the yellow, green and orange glow powders - so you end up with 4 different slimes. Add as much glitter as you want!
- When your 4 neon slimes are finished, keep them separate for now. Prepare 4 chunks of each of the clay colors. Create a long sausage shape from each of the clays.
- Using the lid of your glow in the dark box as the work surface, lay the 4 slimes and the 4 clay colors next to each other in the shape of a rainbow and add a heap of glitter, flakes, sprinkles and foam balls. Just go for it and add what you like!
- Charge the slimes with your UV torch and marvel at your tropical rainbow creation in dark room... Can
 you complete the tropical picture by drawing palm trees and sunshine onto the lid of the box with
 your UV torch? Don't forget to take some photos before you get messy mixing everything up
 together!

Warning, do not expose UV light directly toward or in the eye All contents in this kit are Non-Edible! Do not eat or put any of the contents of this kit near or in your mouth!

PARENTS' SECTION - READ BEFORE USE

ALWAYS SUPERVISE YOUR CHILDEN WHEN PLAYING WITH THIS KIT. DO NOT CONSUME ANY INGREDIENTS WITHIN THE KIT.

THIS PRODUCT IS NOT FOOD.

WARNING!! This kit is to be used solely under the strict supervision of adults that have read and fully understand the safety precautions given in the set. Not suitable for children under 36 months old. Use with care and only under adult supervision.

FULL SAFETY INFORMATION

All ingredients in this kit should always be handled with care and never consumed or eaten. In case of contact with mouth or eyes, wash with water carefully. If in doubt, contact a physician immediately.

THE PRODUCT CONTAINS SMALL PARTS AND SHOULD BE KEPT AWAY FROM CHILDREN YOUNGER THAN 36 MONTHS.

PER ITEM SAFETY AND FIRST AID MEASURES

Activator - Serious eye damage or eye irritation, category 2 - causes serious eye irritation.

Prevention: Wash skin thoroughly after handling. Wear eye protection / face protection when there is the potential for exposure of the eyes to liquid.

IF INHALED: Move person into fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice or attention.

IF ON SKIN: No first aid required. However, it is recommended that exposed areas are cleaned with soap and water after use.

IF SWALLOWED: Obtain medical attention. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed: Signs and symptoms of exposure to this material through breathing, swallowing, and/or passage of the material through the skin may include: stomach or intestinal upset (nausea, vomiting, diarrhoea) irritation (nose, throat, airways), nose bleeding.

Notes to physician: No hazards which require special first aid measures.

Clay, Glue, Glitter, Colour Ink: This is NOT considered hazardous under the GHS classification. In case of inhalation, skin contact, eye contact, or swallowing, please follow the standard first aid measures outlined

STANDARD FIRST AID MEASURES

General advice: No hazards which require special first aid measures.

IF INHALED: Move person into fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

IF IN EYES: Flush with water as a precaution. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention.

IF ON SKIN: No first aid required. However, it is recommended that exposed areas are cleaned with soap and water after use.

IF SWALLOWED: Rinse with water. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed one known or anticipated symptom.

Notes to physician: No hazards which require special first aid measures.

HANDLING AND STORAGE

Do not breathe vapours or mist. Avoid contact with eyes. Do not smoke. Smoking, eating, and drinking should be prohibited in the application area.

DISPOSAL

Dispose of in accordance with all applicable local, state, and federal regulations. Do not dispose of waste into sewer. Do not contaminate ponds, waterways, or ditches with chemical or used container.

DESIGNED IN THE UK. MADE IN CHINA.

Warning, do not expose UV light directly toward or in the eye.

↑ WARNING:

This product contains a Button or Coin Cell Battery, A swallowed Button or Coin Cell Battery can cause internal chemical burns in as little as two hours and lead to death. Dispose of used batteries immediately. Keep new and used batteries away from children. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

CAUTION:

- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
- Do not use rechargeable batteries.

Use only batteries of the same equivalent type as recommended.

Insert batteries so that polarity is correct.

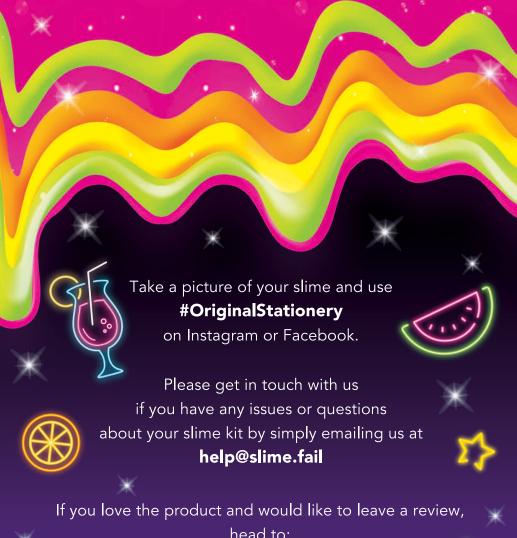

Remove exhausted batteries from toy.

BATTERY DISPOSAL:

Do not dispose of this product in fire. batteries inside may explode or leak. Do not bury or burn.

The installed batteries may become weak or discharge prior to purchase and the purchaser may need to replace them with fresh batteries to ensure proper operation.
