USING YOUR SLIME KIT SAFETY

Full safety information is at the back of this book. Please make sure an adult reads these instructions before using the kit.

Children should use this kit under the supervision of adults. The kit is not suitable for children below 3 years old.

Keep contents of kit away from eyes and mouth. In case of contact, wash with plenty of water.

WHAT IS ASMR ? *Here's the science bit...*

AUTONOMOUS SENSORY MERIDIAN RESPONSE

....in our language that means oddly satisfying crunchy, popping, squelchy noises and super cool videos of crazy things being added to slime! This is the latest craze and you're going to be an expert in it! So grab your phone, pop it in the phone holder included and start creating awesome **ASMR** slime videos! Make each of the slimes in the manual and then choose which add in's you will put in your satisfying slimes.

We want you to get super creative and see what mixtures make the best sounds or look awesome in your videos when you knead, pull, squish and stretch those slimes!

TOP TIPS

Why not try using the crunchy sequinbeads in one of your slimes and put your mobile phone close to the slime so you can hear the crazy noises and see the gorgeous glitter as you pull and stretch your slime?

Put a bit of everything in a slime and see what super cool noises that makes!

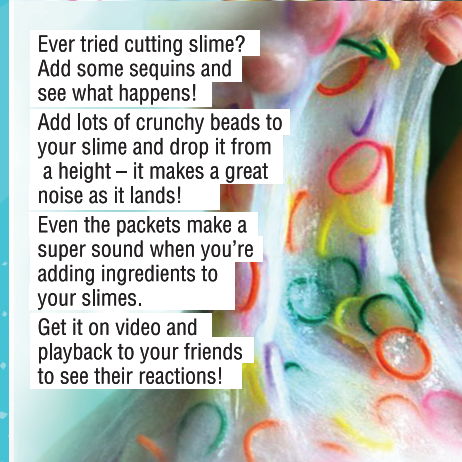

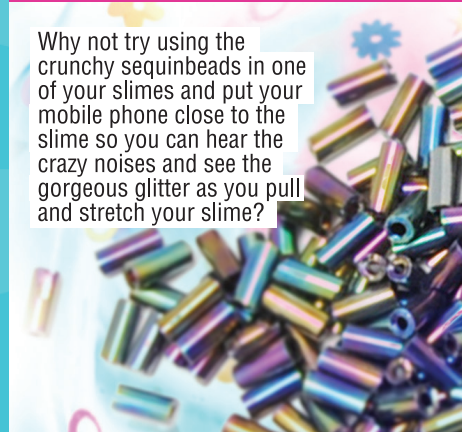

Ever tried cutting slime? Add some sequins and see what happens!

Add lots of crunchy beads to your slime and drop it from a height – it makes a great noise as it lands!

Even the packets make a super sound when you're adding ingredients to your slimes.

Get it on video and playback to your friends to see their reactions!

Make sure your phone is really close to your slime when you're videoing so it picks up the ASMR noises when you're squishing it. Have fun and get creative!!

HEAR THE
CRUNCH!

TIPS AND TRICKS PAGE

Uh oh! My slime isn't looking quite right. What can I do?!

We have loads of simple solutions to help you get back on track with your slime.

It's not mixing or its not bright enough.

Make sure to add the color BEFORE you add activator water. This will help to make sure the color gets mixed in correctly. If you need it to be brighter, you can always add a little more.

I want a stretchier slime. How can I do that?

To ensure your slime is super soft and stretchy it's really important not to add too much activator, otherwise your slime will turn out too hard. Follow the instructions in the booklet carefully to make sure you have the stretchiest slime. It helps to knead your slime for at least 5 minutes. Also, you could try adding some of the clay into your slime for added fluffiness and softness.

My slime is all wet and nasty. What's wrong?

Sometimes if you get the ratio of glue or water a little bit wrong then your slime can be a little bit wet. There are three simple things you can do to fix this:

1. The slime must be kneaded really well for at least 5 minutes. A good for kneading is to squash, stretch and fold the slime and knead it between your thumb and fingers. As long as you have used the correct amounts of glue and activator as directed, you will notice that after 5 minutes of this kneading method, that the slime will begin to form and lose its stickiness.
2. If after kneading your slime really well, it is still wet and sticky, try adding 2 or 3 small drops (not squirts) of activator and repeat the kneading process.
3. Finally, you could try leaving the slime to dry for 2 to 4 hours. This is best if you have added too much water.

I left my slime for a day and now it's dried up. Can I fix it?

It's difficult to revive a dead slime. The best thing to do is start again and have loads more fun making new slime. Remember to keep your slime in the containers provided to make sure it lasts a long time.

I've mixed it but it doesn't look like slime. How come?

Sometimes slime needs to work with your hands a little bit before it turns into slime. So get stuck in and get messy. Keep trying and following our instructions, you'll be making perfect slime in no time.

Some important rules to remember when you are learning to make slime.

1. Always add colors and scent with glue and stir before you add the activator to the mixture to ensure the liquids are distributed equally.
2. NEVER use too much activator at once. Only use very small quantities at a time and then stir for 30 seconds each time to ensure you don't make your slime too hard. Slime making requires patience and determination!
3. Have fun and experiment with your slime recipes! Bring out your inner scientist and enjoy the process!

BASIC SLIME

Basic stretchy slime you'll need for other recipes

30ml Glue

Activator

Stirrer

Measuring Cup

Mixing Bowl

3 Spoonfuls of Activator

BEFORE YOU START: The ink could stain and slime is messy. Use a plastic sheet or non-porous tablecloth to protect your surface. Wear old clothes. If you get slime on the clothes, hand wash immediately in very warm water. This will help the glue to break down.

- Measure out 30ml clear glue in the measuring cup and pour into the mixing bowl.
- Place the nozzle lid onto the activator bottle for more accurate measurements.
- Add 3 level spoonfuls of activator water, using the measuring spoon to the mixing bowl and stir for 30 seconds until the slime starts to form. You'll know when your slime is properly formed as it will come away from the sides of the mixing bowl and stick together. If you feel like the slime isn't forming and it is too sticky, add another 1 or 2 small drops of activator water - not spoonfuls, just small drops at this stage.
- Knead the slime really well in your hands for a few minutes until it is soft and stretchy.

HANDY TIP! Always add colors or glitters just before adding activator. All you need to do is make sure they are stirred in really well.

All contents in this kit are Non-Edible! Do not eat or put any of the contents of this kit near or in your mouth!

BASIC CRYSTAL CLEAR SLIME

Crystal clear slime that is glossy and stretchy!

30ml Glue

Activator

Stirrer

Measuring Cup

Mixing Bowl

3 Spoonfuls
of Activator

BEFORE YOU START: The ink could stain and slime is messy. Use a plastic sheet or non-porous tablecloth to protect your surface. Wear old clothes. If you get slime on the clothes, hand wash immediately in very warm water. This will help the glue to break down.

- Measure out 30ml clear glue in the measuring cup and pour into the mixing bowl.
- Measure out 30ml of water in the measuring cup and also pour into the mixing bowl.
- Place the nozzle lid onto the activator bottle for more accurate measurements.
- Add 3 level spoonfuls of activator water, using the measuring spoon to the mixing bowl and stir for 30 seconds until the slime starts to form. You'll know when your slime is properly formed as it will come away from the sides of the mixing bowl and stick together. If you feel like the slime isn't forming and it is too sticky, add another 1 or 2 small drops of activator water - not spoonfuls, just small drops at this stage.
- Knead in your hands until it is stretchy. The slime is best after about 3 minutes.

HANDY TIP! Always add colors or glitters just before adding activator. All you need to do is make sure they are stirred in really well.

All contents in this kit are Non-Edible! Do not eat or put any of the contents of this kit near or in your mouth!

BASIC BUTTER SLIME

A soft, spreadable slime!

30ml Glue

Activator

White Clay

Stirrer

Measuring Cup

Mixing Bowl

3 Spoonfuls
of Activator

BEFORE YOU START: The ink could stain and slime is messy. Use a plastic sheet or non-porous tablecloth to protect your surface. Wear old clothes. If you get slime on the clothes, hand wash immediately in very warm water. This will help the glue to break down.

- Measure out 30ml clear glue in the measuring cup and pour into the mixing bowl.
- Add 3 squirts of an ink color of your choice.
- Place the nozzle lid onto the activator bottle for more accurate measurements.
- Add 3 level spoonfuls of activator water, using the measuring spoon to the mixing bowl and stir for 30 seconds until the slime starts to form.
- You'll know when your slime is properly formed as it will come away from the sides of the mixing bowl and stick together. If you feel like the slime isn't forming and it is too sticky, add another 1 or 2 small drops of activator water - not spoonfuls, just small drops at this stage.
- Knead in your hands until it is stretchy.
- Add an equal amount of clay to the slime.
- Knead together until fully mixed.

HANDY TIP! Always add colors or glitters just before adding activator. All you need to do is make sure they are stirred in really well.

All contents in this kit are Non-Edible! Do not eat or put any of the contents of this kit near or in your mouth!

EXPERIMENT WITH YOUR SLIME!

How inventive can you get with your satisfying slime sounds? Slime making is all about being creative, having fun and perfecting your ASMR slime making skills!

We want to hear and see your slime crunches and pops so tag us @originalstationery in your Instagram and Facebook posts and we'll share the love!

Stationery®

PARENTS' SECTION - READ BEFORE USE

**ALWAYS SUPERVISE YOUR CHILDREN WHEN PLAYING WITH THIS KIT.
DO NOT CONSUME ANY INGREDIENTS WITHIN THE KIT.**

THIS PRODUCT IS NOT FOOD.

WARNING!! This kit is to be used solely under the strict supervision of adults that have read and fully understand the safety precautions given in the set. Not suitable for children under 36 months old. Use with care and only under adult supervision.

FULL SAFETY INFORMATION

All ingredients in this kit should always be handled with care and never consumed or eaten. In case of contact with mouth or eyes, wash with water carefully. If in doubt, contact a physician immediately.

THE PRODUCT CONTAINS SMALL PARTS AND SHOULD BE KEPT AWAY FROM CHILDREN YOUNGER THAN 36 MONTHS.

PER ITEM SAFETY AND FIRST AID MEASURES

Activator - Serious eye damage or eye irritation, category 2 - causes serious eye irritation.

Prevention: Wash skin thoroughly after handling. Wear eye protection / face protection when there is the potential for exposure of the eyes to liquid.

IF INHALED: Move person into fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice or attention.

IF ON SKIN: No first aid required. However, it is recommended that exposed areas are cleaned with soap and water after use.

IF SWALLOWED: Obtain medical attention. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed: Signs and symptoms of exposure to this material through breathing, swallowing, and/or passage of the material through the skin may include: stomach or intestinal upset (nausea, vomiting, diarrhoea) irritation (nose, throat, airways), nose bleeding.

Notes to physician: No hazards which require special first aid measures.

Clay, Glue, Glitter, Colour Ink: This is NOT considered hazardous under the GHS classification. In case of inhalation, skin contact, eye contact, or swallowing, please follow the standard first aid measures outlined below.

STANDARD FIRST AID MEASURES

General advice: No hazards which require special first aid measures.

IF INHALED: Move person into fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

IF IN EYES: Flush with water as a precaution. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention.

IF ON SKIN: No first aid required. However, it is recommended that exposed areas are cleaned with soap and water after use.

IF SWALLOWED: Rinse with water. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed: One known or anticipated symptom.

Notes to physician: No hazards which require special first aid measures.

HANDLING AND STORAGE

Do not breathe vapours or mist. Avoid contact with eyes. Do not smoke. Smoking, eating, and drinking should be prohibited in the application area.

DISPOSAL

Dispose of in accordance with all applicable local, state, and federal regulations. Do not dispose of waste into sewer. Do not contaminate ponds, waterways, or ditches with chemical or used container.

DESIGNED IN THE UK. MADE IN CHINA.
