Using Your Slime Kit Safely

Full safety information is at the back of this book. Please make sure an adult reads these instructions before using the kit.

Children should use this kit under the supervision of adults. The kit is not suitable for children under 3 years old.

Keep contents of kit away from eyes and mouth. In case of contact, wash with plenty of water.

And finally, try to avoid the common disease known as "Slime Obsession"!

Thanks for
buying our
Unicorn
Slime Kit!

We hope you
have lots of fun
getting creative
with your slime.
You can use this
manual as a guide
to get started!

What did the slug say
as he slipped down the wall?

What's in my Unicorn Slime Kit?

Tips and Tricks Page

Uh oh! My slime isn't looking quite right. What can I do?!

Don't worry my slime making pals. We have loads of simple solutions to help you get back on track with your slime.

It's not mixing or it's not bright enough.

Make sure to add the color BEFORE you add activator water. This will help to make sure the color gets mixed in correctly. If you need it to be brighter, you can always add a little more.

I want a stretchier slime. How can I do that?

There are loads of ways you can make a stretchier slime. You can add shaving foam (not included) or foam lotion (not included) just before the activator stage. Stirring for a minute will make your slime extra stretchy.

My slime is all wet and nasty. What's wrong?

Sometimes if you get the ratio of glue or water a little bit wrong then your slime can be a little bit wet. There are two simple things you can do to fix this:

1. Add a little bit more activator.
2. Leave the slime to dry for 2 to 4 hours. This is best if there is too much water.
3. Sometimes the heat of your hands and playing with the slime is all it needs. Get in there and get messy kneading your slime.

I left my slime for a day and now it's dried up. Can I fix it?

It's difficult to revive a dead slime. The best thing to do is start again and have loads more fun making new slime. Remember to keep your slime in the containers provided to make sure it lasts a long time.

I've mixed it but it doesn't look like slime. How come?

Sometimes slime needs to be worked with your hands a little bit before it turns into slime. So get stuck in and get messy! Keep trying and following our instructions you'll be making perfect slime in no time.

Basic Slimes

Your basic stretchy slime. You'll need this for the other recipes.

Before you start: the inks could stain and slime is messy. Use a plastic sheet or non-porous tablecloth to protect your surface. Wear old clothes. If you get slime on your clothes, hand wash immediately in very warm water. This will help the glue to break down.

Basic Slime 1

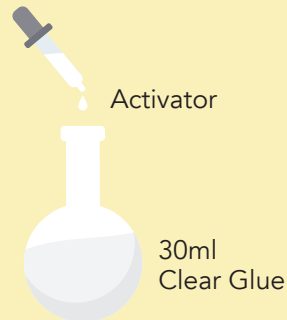

*Basic stretchy slime
you'll need for the other recipes.*

Measure out 30ml clear glue in the measuring pot.

Find the extra nozzle for the activator. Add in a few drops of activator and stir for 30 seconds.

If the slime is not sticking together, add more activator. If the slime is too hard, there is too much activator, so start again, adding a little less.

Knead in your hands until it is stretchy. The slime is best after about 3 minutes of kneading.

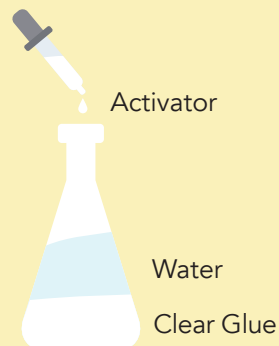

Basic Clear Slime

*Crystal clear slime that is
glossy and stretchy!*

Mix an equal amount of clear glue and water until it is well combined.

Add in a few drops of activator and stir for 30 seconds. If the slime is not sticking together, add more activator.

Knead in your hands until it is stretchy.

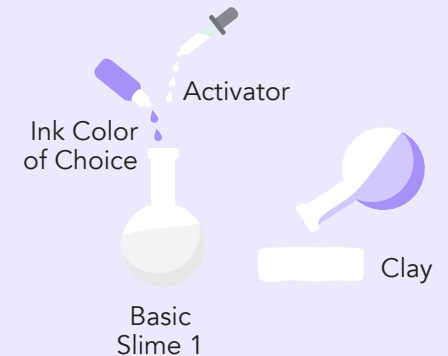

Butter Slime

A soft, spreadable slime!

Make Basic Slime 1 and add a colour of your choice before the activator.

Add an equal amount of clay to the slime.

Knead together until fully mixed.

Cloud Slime

Unicorns love this one!

Make Basic Slime 1 in a separate container using 60ml clear glue. Once the slime is made, add the same amount of clay. Mix until combined.

In a bowl, add 100ml of water to the snow powder. It should expand to create fluffy snow.

Measure out 20ml of snow in the measuring cup provided. Knead it into your slime. You can add more activator here if it's too sticky. Be careful not to add too much snow or your slime will start to fall apart.

Fluffy Colored Clay Slime

A crazy slime that feels a little like a marshmallow!

You can play with the clay by itself - it feels amazing! If it gets a little dry or you want to add some color, you can use the recipe below:

Mix 20ml warm water with your favourite ink color. Add more ink to make it really bright.

Knead it together with one bag of clay for about 3 to 5 minutes until all the water is gone (this is messy).

Alternative: Add 2 to 3 squirts of shaving foam (not included in this kit) and knead until all the foam is gone. It is super messy but super fun!

Candyfloss Cloud Slime

Make the Cloud Slime and add a drop of candy scent and pink ink color.

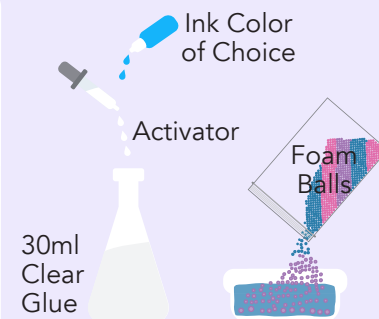

Floam Slime

A crunchy and satisfying slime!

Measure out 30ml of clear glue. Add an ink of your choice and stir until combined.

Add in a few drops of activator and stir for 30 seconds. Add more activator if the slime is still too sticky. You could add clay to this slime if you would like to make it fluffy.

Add some foam balls and knead them into the slime. Start with a few and then add more gradually until you are happy with your slime.

Fishbowl Slime *A fun crunchy slime!*

Make a Basic Slime 1 and add in your choice of ink, glitter or scent, before adding the activator. If the slime is not sticking together, add more activator, but don't add too much as you need a sticky slime to keep the beads in.

Add fishbowl beads to the slime. To get a really crunchy effect, use a small amount of slime with lots of beads.

If the slime is too sticky after adding the beads, add a little more activator.

If you want a clearer slime, leave it in an airtight container overnight.

Jelly Cube Slime

A great sounding crunchy slime!

To make colored foam cubes (optional), add a few drops of pigment to approximately 20ml of water. Leave the cubes in the water for 24 hours. Squeeze out the excess water and let them dry. Make sure you do this to avoid a wet slime.

Make Basic Slime 1, adding in your choice of glitter, scent or color, before adding the activator.

Add a few foam cubes at a time and gently fold them into the slime. Keep adding foam cubes until you are happy with your jelly cube slime.

Bubblegum Jelly Cube Slime

Use the Jelly Cube Slime recipe and add a drop of bubblegum scent and your choice of colour before adding the foam cubes.

Colorful Scented Glitter Slimes

Create the slime of your dreams!

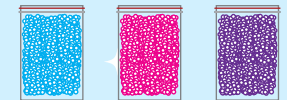

Ink Colors

Any slime can be made into bright amazing colors with tons of sparkle AND smell delicious!

Combine different inks to make nearly any color you like! What can you come up with?

Always add colors, scent, or glitters just before adding activator.
All you need to do is make sure they are stirred in really well.

Flake Glitters

Bubblegum, Candy, Strawberry, and Vanilla Scent Flavors

PARENTS' SECTION - READ BEFORE USE

ALWAYS SUPERVISE YOUR CHILDREN WHEN PLAYING WITH THIS KIT.

DO NOT CONSUME ANY INGREDIENTS WITHIN THE KIT.

THIS PRODUCT IS NOT FOOD.

WARNING!! This kit is to be used solely under the strict supervision of adults that have read and fully understand the safety precautions given in the set. Not suitable for children under 36 months old. Use with care and only under adult supervision.

FULL SAFETY INFORMATION

All ingredients in this kit should always be handled with care and never consumed or eaten. In case of contact with mouth or eyes, wash with water carefully. If in doubt, contact a physician immediately.

THE PRODUCT CONTAINS SMALL PARTS AND SHOULD BE KEPT AWAY FROM CHILDREN YOUNGER THAN 36 MONTHS.

PER ITEM SAFETY AND FIRST AID MEASURES

Activator - Serious eye damage or eye irritation, category 2 - causes serious eye irritation.

Prevention: Wash skin thoroughly after handling. Wear eye protection / face protection when there is the potential for exposure of the eyes to liquid.

IF INHALED: Move person into fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice or attention.

IF ON SKIN: No first aid required. However, it is recommended that exposed areas are cleaned with soap and water after use.

IF SWALLOWED: Obtain medical attention. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed: Signs and symptoms of exposure to this material through breathing, swallowing, and/or passage of the material through the skin may include: stomach or intestinal upset (nausea, vomiting, diarrhoea) irritation (nose, throat, airways), nose bleeding.

Notes to physician: No hazards which require special first aid measures.

Clay, Glue, Glitter, Color Ink: This is NOT considered hazardous under the GHS classification. In case of inhalation, skin contact, eye contact, or swallowing, please follow the standard first aid measures outlined below.

STANDARD FIRST AID MEASURES

General advice: No hazards which require special first aid measures.

IF INHALED: Move person into fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

IF IN EYES: Flush with water as a precaution. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention.

IF ON SKIN: No first aid required. However, it is recommended that exposed areas are cleaned with soap and water after use.

IF SWALLOWED: Rinse with water. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed: None known or anticipated symptom.

Notes to physician: No hazards which require special first aid measures.

HANDLING AND STORAGE

Do not breathe vapours or mist. Avoid contact with eyes. Do not smoke. Smoking, eating, and drinking should be prohibited in the application area.

DISPOSAL

Dispose of in accordance with all applicable local, state, and federal regulations. Do not dispose of waste into sewer. Do not contaminate ponds, waterways, or ditches with chemical or used container.

DESIGNED IN THE UK. MADE IN CHINA.
